Ooma, Inc., today announced that 2600Hz, an Ooma company, has introduced powerful new desktop and mobile apps for its unified communications platform, giving service providers a competitive advantage in serving their customers without having to build or maintain the apps themselves. The new DesktopComm app (shown here) and MobileComm app allow users the flexibility to work on the device and in the location of their choice with a robust feature set.

2600Hz (<https://www.2600hz.com/>) created, maintains and enhances the 2600Hz turnkey API-first solution that brings together Unified Communications as a Service (UCaaS), Contact Center as a Service (CCaaS) and Communications Platform as a Service (CPaaS) on a single code base. This rich feature set is paired with customization options through more than 300 open APIs, all packaged in a white-label solution that empowers resellers and service providers to build and maintain their brand recognition along with

their own differentiated intellectual property.

The new DesktopComm and MobileComm apps give users the flexibility to work on the device and in the location of their choice with a robust feature set, allowing them to:

- Make and receive voice calls
- Transfer and park calls
- Record calls
- Access company contacts
- Participate in team chats
- Listen to voicemails
- Send and receive electronic faxes
- View call logs
- Start or join video meetings using the desktop app or via a browser

DesktopComm is available now for Windows and Mac; MobileComm is available now for iOS and Android.

“Ooma acquired 2600Hz two years ago because we saw the huge potential in expanding the platform’s capabilities – both for our own [Ooma Office](#) business phone system, which is built on 2600Hz, and for service providers looking to control their destiny when offering UCaaS,” said Chris Burgy, senior vice president of corporate development at Ooma. “DesktopComm and MobileComm are outstanding examples of how Ooma is making 2600Hz stronger.”

Forward-Looking Statements

This release includes “forward-looking statements” within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended. Statements in this press release that are not statements of historical or current fact constitute “forward-looking statements.” The forward-looking statements contained in this press release include, without limitation, statements related to the expected benefits of the 2600Hz acquisition and the functionality, features and benefits of services and solutions offered by 2600Hz. Such forward-looking statements involve known and unknown risks, uncertainties and other unknown factors that could cause the actual results to be materially different from any future results expressed or implied by such forward-looking statements. The forward-looking statements contained herein are also subject generally to other risks and uncertainties that are described from time to time in Ooma’s filings with the Securities and Exchange Commission, including under Item 1A, “Risk Factors” in the Company’s Annual Report on Form 10-K for the fiscal year ended January 31, 2025, filed on April 1, 2025, and in its subsequent reports on Forms 10-Q and 8-K. Investors are cautioned not to place undue reliance on such forward-looking statements, which speak only as of the date they are made. Ooma undertakes no obligation to publicly update or revise any forward-looking statement, whether as a result of new information, future events or otherwise.

About Ooma

Ooma (NYSE: OOMA) delivers phone, messaging, video and advanced communications services that are easy to implement and provide great value. Founded in 2003, the company offers Ooma Office for small to medium-sized businesses seeking enterprise-grade features designed for their needs; Ooma AirDial for any business looking to replace aging and increasingly expensive copper phone lines; Ooma 2600Hz for businesses that provide

their own communications solutions built on an outsourced underlying platform; and Ooma Telo for residential consumers who value a landline experience at a more affordable price point. Ooma's award-winning solutions power more than 1.2 million users today. Learn more at www.ooma.com in the United States or www.ooma.ca in Canada.
