Looking forward, we intend to continue to invest in our key strategic initiatives and the development of new partnerships to drive profitable growth."

Non-GAAP Financial Measures

In addition to disclosing financial measures prepared in accordance with U.S. generally accepted accounting principles ("GAAP"), this press release and the accompanying tables contain certain non-GAAP financial measures, including: non-GAAP net income, non-GAAP net income per share, non-GAAP gross profit and gross margin, non-GAAP operating income, and Adjusted EBITDA. Adjusted EBITDA represents the net income before interest and other income, income tax provision, depreciation and amortization of capital expenditures, amortization of intangible assets, and stock-based compensation expense and related taxes.

Other non-GAAP financial measures exclude stock-based compensation expense and related taxes, and amortization of intangible assets. Non-GAAP weighted-average diluted shares include the effect of potentially dilutive securities from the company's stock-based benefit plans.

These non-GAAP financial measures are presented to provide investors with additional information regarding our financial results and core business operations. Ooma considers these non-GAAP financial measures to be useful measures of the operating performance of the company, because they contain adjustments for unusual events or factors that do not directly affect what management considers to be Ooma's core operating performance and are used by the company's management for that purpose. Management also believes that these non-GAAP financial measures allow for a better evaluation of the company's performance by facilitating a meaningful comparison of the company's core operating results in a given period to those in prior and future periods. In addition, investors often use similar measures to evaluate the operating performance of a company.

Non-GAAP financial measures are presented for supplemental informational purposes only to aid an understanding of the company's operating results. The non-GAAP financial measures should not be considered a substitute for financial information presented in accordance with GAAP and may be different from non-GAAP financial measures presented by other companies. A limitation of the non-GAAP financial measures presented is that the adjustments relate to items that the company generally expects to continue to recognize. The adjustment of these items should not be construed as an inference that the adjusted gains or expenses are unusual, infrequent or non-recurring. Therefore, both GAAP financial measures of Ooma's financial performance and the respective non-GAAP measures should be considered together. Please see the reconciliation of non-GAAP financial measures to the most directly comparable GAAP measure in the tables below.
